

# PathConnect™

## Automatic transfer of pathology data to Impac Software Cancer Registry

*Maximize your investment in oncology IT by automatically transferring data from PowerPath®, Impac Software's anatomic pathology system, to METRIQ® Integrated Oncology Data Management System.*

PathConnect is an HL7 compliant interface that supports the import of both text and discrete data elements to expedite the abstracting of pathology data.

- Automate case finding from pathology
- Ability to select cases for import into the registry database
- Identify new cases and update existing cases
- Capture College of American Pathology (CAP) protocol discrete data elements (synoptics)
- Includes text data transfer from pathology systems
- Supports PowerPath HL7 interfacing and CAP data exports
- Onsite and remote training options

By integrating pathology information, PathConnect facilitates case finding and provides a more complete abstract without redundant data entry

### Benefits:

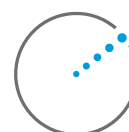

**How can PathConnect help your cancer registry program?**

- Automatically transfer data from PowerPath anatomic pathology system to METRIQ
- Includes synoptic (discrete) data elements from pathology and SNOMED codes plus text data
- Provides enhanced reporting capabilities
- Save time by eliminating redundant data entry to improve quality
